

Archiving Internet Citations with Perma.cc

The 22nd edition of The Bluebook now requires authors to archive any internet source they cite. Under Rule 18.2.1(d), a citation to an internet source must also include a citation to an archived version of that source, so that readers can access the page exactly as it appeared at the time it was cited.

What is Perma.cc?

Perma.cc is one of the archiving tools approved for this purpose. It creates a permanent snapshot of a webpage and gives you a stable link to cite alongside the original URL. A Perma.cc link will never expire, so your citation stays verifiable no matter what happens to the live page.

Get a Free Account

The BYU Law Library sponsors free individual Perma.cc accounts for BYU Law students. To request one:

1. Email Annalee Hickman Pierson at **HickmanA@law.byu.edu** and ask to be sponsored for a free Perma.cc account.
2. Watch for a confirmation email from Perma.cc. You must activate your account within 72 hours of receiving it.
3. Once activated, create a Perma.cc link for each internet source you cite and include it in your citation.
